

Vietnam Electricity – Ho Chi Minh, Completes ACCC Conductor Installation in Vietnam

by [Dave Bryant](#) | May 8, 2020 | [CTC ACCC Conductor project](#)

With the support of Power Construction Company One, Vietnam Electricity (EVN) completed their 25 kilometer, 110 KV Phu Lam to Long An, ACCC Reconductor project. EVN selected Glasgow size ACCC conductor supplied by PT KMI Wire and Cable Tbk to replace 240/32 ACSR conductor. Hardware for the project was supplied by PLP.

Mr. Tung, Mr. Lam and Mr. Tiep of Vietnam Technique Development Company (VTD) provided ACCC Training and Support. Vietnam Electricity is the largest power company in Vietnam. Vietnam Electricity was established by the government of Vietnam as a state-owned company in 1994, and has operated officially as a one-member limited liability company since 2010. To date, EVN has completed more than 20 ACCC Conductor upgrade projects in Vietnam.
